PRECISION XTREME PENCIL

“TWO FREQUENCIES, COUNTLESS STRIKES.”

Precise Design – Xtreme Action! Inside the Precision Xtreme Pencil’s durable and throughwired plastic body is an internal weight system that makes the lure one of the best-casting baits in its category. The internal weight doubles as the Dual Frequency Knocker: as the weight slides along the internal railing, it hits a durability-increasing plastic pillar and a stainless-steel weight in turns. This results in a sequence of high and low pitch, attracting fish from near and far! The extremely detailed Precision Xtreme Pencil features printed scales, a new 3D holographic eye, and comes in 12 fish-catching freshwater colors.

Topwater • Walk-the Dog Action • Wire-Through Construction • Dual Frequency Knocker • Ultra-Long Casting • Durable Plastic Body with Internal Pillar • Lead-Free • Textured Translucent Body with Ultra-Detailed Finishes • New 3D Holographic Eye • VMC® 7548 Black Nickel Treble Hooks

X-RAP® HAKU

**NEW

CASTING

Built tough for big fish, X-Rap® Haku features Rapala's proprietary 3R System* Titanium Release Rig with VMC® Coastal Black hooks. When rigged for action, the hooks are positioned just like on a regular glide bait, and the rig rests in the lure's belly groove, out of the way and protected from weeds and snags. At hook-set, the hook rig will release from the body, letting the fish have no chance to breakfree. The rig also makes removing the hooks easier the fish as the body of the lure is not in the way. X-Rap® Haku can be used for different presentations and it is super easy to use. Gliding action can be created by either twitching with the rod or by using a stop & go retrieve.

*Rapala® Release Rig : System is built in to lure and out of the way when rigged. Upon hook-set, the clip at the tail will release the rig from the body, allowing a direct contact to the fish and letting the fish have no chance to use the lure as leverage to break free. The durable rig is built with 100 lbs titanium wire and features a solid connector ring, heavy-duty split rings and premium VMC® Coastal Black round bend trebles.

Flash-X Dart

"LONG DISTANCE PLUG."

CAST, RETRIEVE, PAUSE, STRIKE! - The Flash-X Dart is heavily weighted to cast farther than other lures in its class. Thanks to its prismatic design, the lure sinks with a side-flashing fluttering action on the pause and remains stable when retrieved at high speed. Additionally, this unique shape makes the Flash-X Dart catch and reflect light like a mirror ball, attracting fish from a wide area. A wired-through construction ensures that this lure is built to withstand big fish and strong drag pressure.

Designed for Long Casting Distance • For Saltwater Predators • Side-to-Side Darting Action • Sinking, Flutters on the Drop • Durable Wire-Through Construction
Lead-free • Plastic Body with Metalized Coating for Extreme Flash • Unique Prismatic Design • Premium VMC® 7556 3X Treble Hooks

Flash-X Extremo

"LONG DISTANCE FLASHBAIT"

Built with Rapala's proprietary MaxCast system, the Flash-X Extremo gets you closer to those distant fish. The MaxCast system features four precision weighted tungsten balls moving on a rail. The balls shoot towards the tail as you cast, improving stability, and reaching impressive distances. When you begin your retrieve, the MaxCast tungsten balls shift to the head, enhancing the lure's fish-catching rolling action. Jerk it aggressively to imitate a distressed baitfish or crank it fast with a pause in between to entice a bite. A wired-through construction ensures that this lure is built to withstand big fish and strong drag pressure.

Designed for Long Casting Distance • For Saltwater Predators • For Fast and Aggressive Retrieves • Sinking • Durable Wire-Through Construction • Lead-free Plastic Body with Metalized Coating for Extreme Flash • Unique Prismatic Design • Premium VMC® 7554 2X Treble Hooks

Flash-X Skitter

“LONG DISTANCE TOPWATER.”

Built to soar and skitter, the Flash-X Skitter perfectly mimics one of the most hunted saltwater baitfish in the ocean – the needlefish. The tapered prism design creates impressive flash above and below the water while also acting as a keel to improve stability during a high-speed retrieve, keeping the head up. Cast it out and crank it fast to send it skittering across the surface like an escaping fish that no predator can resist. A wired-through construction ensures that this lure is built to withstand big fish and strong drag pressure.

BRAIDED LINE

832 ADVANCED SUPERLINE®

Sufix 832 Advanced Superline® is the strongest, most durable small diameter braid. It is built with 8 fibers (7 HMPE plus 1 GORE® Performance Fiber) and 32 weaves (pics) per inch. Due to its high-pitch count, it is also hydrophobic (water-repellent). The R8 Precision Braiding and fiber technology provide superior strength, roundness and line consistency. By adding GORE® Performance Fibers we improve abrasion resistance, increase casting length/accuracy and reduce line vibration. HMPE fibers provide the high strength and sensitivity, hydrophobic water-repellent protection and small diameter. All of this makes Sufix 832 Advanced Superline® 30x more abrasion-resistant than other braids. This line is great for casting, trolling and jigging, when high abrasion-resistance is needed. It is ideal for medium to large lures and brutal and intense casting techniques. Are you targeting zander, pike, perch or carp? Then you have to try this line out!

CASTING

VIBRAX® NORDIC FLAKE

Bring the night sky down into your tackle box with our Northern Lights Vibrax® series, modeled from the Vibrax® Original which has laid the foundation for a vast collection of spinners from Blue Fox for today's angling styles. The patented two-part body, which virtually eliminates line twist is really what sets all Blue Fox spinners apart. Whether casting for still water predators such as perch and chub, or working fast moving rivers for trout and salmon, this low-frequency spinner is going to create the noise and vibration required to trigger a strike.

- 45° Mid-depth blade runs 0.6 – 1.2 meters
- Patented 2-part, machined brass main body
- Rattling, free-turning brass gear
- Stainless steel shaft
- Northern lights imitation patterns with high quality finishes
- Fitted with VMC® hook
